

## affilinet statistics web services

### Simple automatic reporting

#### Statistics web services

The new advertiser statistics web services offer you automatic access to your affilinet account, without needing to log in to the affilinet portal.

It provides you with the data specified in individual statistic requests you make. You can automate reporting and apply the same filter criteria as the statistics on the affilinet portal, saving you valuable time.

Web services support SOAP and allow direct exchange between the affilinet database and your in house solution.

#### Toolbox web services

Toolbox web services are designed to tailor your statistics request to your exact needs. They provide you with detailed statistics on different channels, publisher segments, creatives and rates.

#### Access to web services

Log in to your advertiser account at <http://www.affili.net>. Then go to "Account" > "Account Data". You will be able to activate web services for your account, reset passwords and, if you manage more than one affiliate program, adapt authorisation rights for each web service account.
